Lost minutes could be costing thousands of dollars per year.

Take control of your labor costs today with an Acroprint time recorder. Your investment will pay for itself quickly because tracking employee time and attendance saves your business time and money. An employee that takes a few extra minutes of company time for his or her own personal use affects your bottom line. Those minutes add up over time and before you know it a couple of dollars compound into hundreds of dollars. Just review the chart to see how valuable time tracking is to your business. Based on 250 working days per year, the chart shows the cost of time lost at the conservative rate of 20 minutes a day.
